

WeSeSo Cyber Warrior comic on Catfishing and its protection Mantra!!

Cat Fishing

Let us see the messages... See, he has not posted many messages, even messages that are not very relevant to cricket or his hobbies.

So what scam do you see here Didi? I am scared.

Actually, some stalker has tried to trap you. This trick is called **CatFishing**

Scary! What is his modus operandi?

See, this hacker must have targeted you for some reason. He would have seen your Facebook page and seen your interest in Cricket and your liking for Virat. He created a fake profile of Virat and sent you a friend request knowing that you will accept it.

Ohh! That is why he was asking me about where I live and what I do. He was also asking me about my family and friends.

Oh God! Did you share all that?

No, I didn't. I was about to reply.

Be careful with these cyber criminals. They apply many tricks to trap ignorant people like you.

Didi, but now he is my friend. What should I do now?

Don't worry. First of all, block this person by using the settings of your Facebook account. Thereafter, report to Facebook

Sure

In future, before you accept any friend request, remember to verify the credentials. Please understand that once the hacker becomes your friend, he can be dangerous to your family and friends also.

At WeSeSo our motto is 'We Secure Society'. Visit www.weseso.org and you should also become a cyber warrior and frustrate cyber criminals by spreading awareness about their dirty tricks.

Thank You!

A small effort by
