

Wow! new mobile?

Yeah! It is birthday Gift from papa.

**TWO FRIENDS MEET.
ONE NOTICES THE NEW
SMART PHONE ON
OTHER'S HAND.**

Show me..

Yes.. see!

No screen lock, no finger print based security?

Why is that required? Its mine and will remain with me only.

What if you lost it? Do you know any one can quickly misuse your smart phone?

How?

He can make fake call, can transfer money from your PayTm account. He can also act honest by returning to you after dropping a trojan in that to track all your activity later.

Oh, my God! I never thought about it. Now I will ensure my screen lock is enabled.

Yes - never forget to screen lock your mobile. It is the first line of protection.

Better become a Cyber Warrior by taking a quiz on www.weseso.org and help in spreading awareness in society. Because as a Cyber Warrior our motto is We Secure Society.
